"Pink Worldz"

2021

Digital file / 3D model

A 3D digital model of a pink, abstract figure with a complex, tangled structure. The figure is composed of numerous overlapping loops and curves, giving it a sense of movement and depth. It is set against a background of a room with a grey brick wall on the left and a plain grey wall on the right. Several bright cyan lines are scattered throughout the scene, some forming large, sweeping arcs that intersect with the pink figure. The lighting is soft, casting subtle shadows on the floor and wall.
